

3 year Extended Warranty Rates and Policies

Models Covered: **J2KN, J2KN-IND, CN, EN2, CL, SEEA & RACK**

Validity: Extended Warranty only available on new instrument orders and must be purchased in conjunction with the analyzer. The Extended Warranty provides complete coverage of the analyzer for 3 years from date of purchase.

Service Frequency: The Extended Warranty covers service & parts for the analyzer whenever returned to ECOM within the first 3 years of purchase. It is recommended that analyzers be serviced annually, at a minimum. Suitability for use is the sole responsibility of the user. ECOM strongly recommends customers have the gas and ability to perform periodic calibration of the analyzer.

Extended Warranty covers the following:

- *Complete diagnostic evaluation of the analyzer, which includes “as found” condition of the sensors, batteries, pumps, water trap, printer, sample line, probe, and thermocouples.
- *Complete cleaning of analyzer (case, panel and internal cleaning of pumps, bypass valves, tubing, & water trap).
- *Replacement filter kit (Water Trap filters / Inline filters / NOx Beads).
- *Calibration gases used to service the analyzer.
- *Labor to replace required parts.
- *Certificate of Calibration, upon completion of repair.
- *Worn parts, including sensors, pumps, valves, batteries, and printer assemblies.
- *Circuit Boards (Main PCB, Display Boards, Displays, etc.)
- *Return shipping by UPS Ground. (Customer responsible for outgoing freight to ECOM)

* If not covered under original factory warranty, customer is responsible for cost of the following items, which may include, but are not limited to:

- *Sample Lines
- *Probes

Extended Warranty Cost
